Preface

This country report is one part of a comprehensive report presenting the results of an inquiry concerning the institutions, methods and procedures used by governments and parliaments throughout Europe for dealing with long-term and cross-cutting issues. The study was conducted by the *EURES institute* on behalf of the *Office for Technology Assessment of the German Parliament (TAB)*.

Especially the concept of `Sustainable Development` requires a long-term and cross-cutting perspective. Therefore governments and parliaments in many countries are looking for new approaches to deal with these issues. In this context the project aimed at collecting a wide range of information about the institutions and the methods used by them for tackling long-term and cross-cutting issues.

Consequently, this report can also be used as a handbook. It should foster an international exchange of information and experiences concerning these questions. We are confident that the provided information is of practical use for organisations and experts involved in long-term and cross-cutting issues. Unfortunately some parts of the report exist only in a German version. A desirable complete English translation would require to find a source for additional funding

This country report contains:

- A compilation of detailed characterisations of long-term and cross-cutting institutions within the country (English)

More information both concerning the project and the other parts of the report is provided on <http://www.eures.de/r38>.
